ORCHEX® 796 ORCHARD SPRAY OIL RECEIVES OMRI LISTED SEAL

OMRI Listing Allows Product to be used for Organic Production While Maintaining Pesticidal Efficacy

Indianapolis, IN (Oct. 18, 2016) – Calumet Lubricants Co, Limited Partnership, a subsidiary of Calumet Specialty Products Partners, L.P. (NASDAQ: CLMT), a leading independent producer of specialty hydrocarbon and fuels products, announced today its Orchest® 796 Orchard Spray Oil is now an OMRI Listed® product. The listing entitles Orchest 796 to feature the OMRI Listed® Seal, identifying the product as having passed OMRI’s technical review and as compliant with organic standards.

While newly listed for organic production, Orchest 796 Orchard Spray Oil also provides excellent performance through:

- Optimized molecular weight - ensuring low phytotoxicity to crops while maximizing pesticidal strength
- Low surface tension - maximizing spreading coverage, while enhancing attachment of pesticide to plant surfaces
- Low water solubility - providing resistance to rain wash-off, extending pesticide longevity, and preventing seepage into soil

The combination of these unique attributes form optimal protection for a grower’s investment- combining strong, non-damaging pesticide performance with credentials today’s organic consumers can trust.

“Having met the stringent environmental standards for review, the OMRI Listed® status for Orchest 796 demonstrates Calumet’s commitment to bring value to our customers,” said Michael Van Rossum, Product Line Manager, Agri-Business, at Calumet Specialty Products Partners, L.P. “Growers can now meet the demands of organic shoppers without compromising pesticidal efficacy.”

Orchest 796 Orchard Spray Oil is approved for use on a wide variety of applications including tree crops, nut crops, row crops, ornamental trees, and shade trees. In inert or spray applications, the unique advantages offered by Orchest spray oils multiply the effectiveness of active components.
